

IT-traineeship

Boost your skills, utilize your talent and find your dream job.

Career opportunities

Motopp offers a full-time IT-traineeship in which we train statusholders to become IT-professionals in 6 months and guide them to a job at one of our partner clients, such as ABN AMRO, PwC, Municipality of Amsterdam, and many more. Trainees receive extensive training in IT and are matched to positions at our partners based on their experiences and qualities, for example as a software developer, software tester or data analyst.

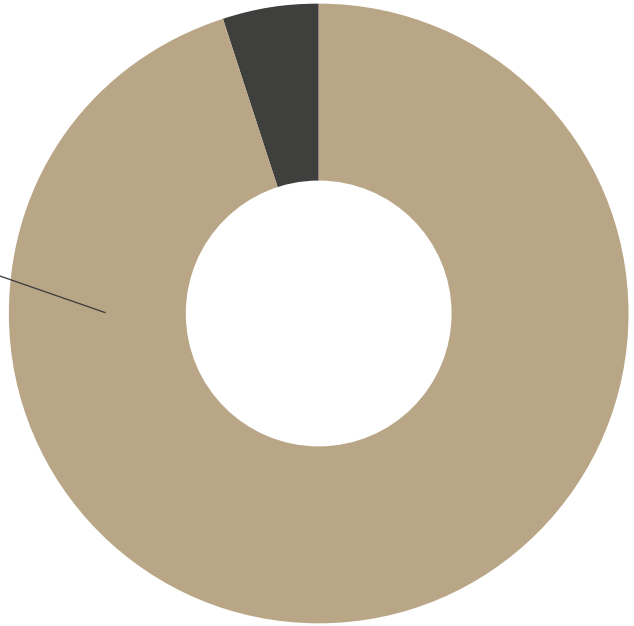

In our training we focus not only on technical skills, but also on the soft skills needed to succeed in a Dutch working environment. A dedicated People Development Manager will guide you throughout the traineeship and your first 18 months at the client, ensuring your smooth integration into the Dutch work environment.

Some of the leading organizations that work with our method:

Our statistics

96%
of the Motoppers who
start at our partners are
still working there!

“Motopp crossed my path and now I work at PwC, along with three other Motoppers. I was lucky to meet the right people, but I also had to work hard for it. Success doesn’t just come out of the blue.”

Tugba
Associate Full Stack Developer,
PwC Nederland

Program

01

BASIC TRAINING

2 WEEKS

- Learn how to pitch your story and gain insight into the Dutch workculture.
- Workshops on story development, presentation skills, building your CV, the basics of IT and Agile/Scrum.

02

IT-BOOTCAMP

12 WEEKS

- Business IT: Project Management, Business Requirements and UI/UX Design.
- Back-end Development: Python, FastAPI and DevOps.
- IT Principles: Testing, ITIL, GDPR and Information Security.

03

INTERNSHIP

4-12 WEEKS

Apply your knowledge and skills in a simulated Dutch Agile working environment, collaborating with application projects, working in two-week sprints, and receiving regular feedback from trainers and mentors.

04

WORKING

Once you're ready to start working, you'll be matched with a position that aligns with your experience and skills, such as a software developer role.
